Bloomden Glaze Kit

Ceramic sintering support material

Bloomden's newly developed Glaze Kit with 3D plastic effect, used with the Basic, Aesthetic, and Gum Kit.

Highlights

Glaze-3D

The first dual bionic technology, three-dimensional shaping accurately restores the natural tooth shape, achieves a two-way improvement in aesthetics and occlusal function, and is suitable for complex crown restoration.

Glaze-F

Breakthrough integration of natural light perception factors, presents a translucent fluorescent texture consistent with native teeth, and glows with a lively life luster under different lighting.

Glaze-2D

Using nano-crystal transparent technology, 1:1 replica of the micro-hardness and light transmittance of tooth enamel, taking into account super wear resistance and bionic aesthetics, to create the most cost-effective restoration solution.
